CPT & Piezocone

Dilatometer

Seismic Dilatometer

Vane Shear

Tee-Bar

Piston & Eziprobe Sampling

PPI Piston Sampling

Piezometer Installation

In Situ Permeability

another way - 2.1m headroom here

## Access Difficult? - Call IGS

We'll find a way to do your job. Here's just one way

up the steps

no problem

very safe - driven by remote control

through the 2.7m height doorway

we removed Tommy's roof - he is then only <2.6m high

roof off

testing away

a successful job all round

Note that with three of our other rigs we can work in 2m headroom or less; right down to 1.6m if you are desperate.

## reducing geotechnical uncertainty
