PPI Piston Sampling
Piezometer Installation
In Situ Permeability

inside the
**Brisbane Airport
Domestic Terminal**
IGS was testing

using our rig
"Little Jack",
ballasted by 11t of
lead weights
and powered by our
whisper-quiet
electric power-
pack, we tested by
piezocone to
around 30m depth

IGS owns these weights and we use them for many similar applications

outside we were
also testing and
sampling

CPTu tests to 30m

direct-push
sampling using
our Vertek Piston
Sampler
