ISC'7 Conference in Barcelona

IGS attended the International Site Characterisation 7 (ISC'7) Conference in Barcelona, from 18th – 21st June. As did a good number of other Aussies – see photo below.

Allan McConnell (founder)
allan@insitu.com.au
0417-748-669

IGS people did far more than just attend. Allan presented a rather weird “questioning” paper, and we ran a very successful mini-symposium titled “Sources of Error in CPT”.

Rio Tinto Training Day – 19th July

IGS ran a nice full-day training seminar for Rio Tinto as part of their *2024 Tailings and Water Storage Summit*. This involved delegates from all over the Rio Tinto world – including Australia, USA, Canada and Mongolia.

Marcelo Llano of Red Earth Engineering (left hand end of the photo below), also contributed to the day.

living proof that life is good at IGS

reducing geotechnical uncertainty

Edition 24-08

high quality in situ testing
high quality sampling
